

## A Letter to the Public

(Blog 0011 AndrewHadden.com)

God told me that I was to write, “A letter to the public,” and to write the flow, of words and thoughts, that he would give me.

God is exposing, by judgment, the evil being worked against you, working beneath the surface, below your feet, evil that is seeking to bring a collapse of all you hold dear. You must awaken, or perish. A world-wide government, a government of evil, is poised to take over this nation and many others. They are using the vaccine to advance their plans. They seek control, total control, of everyone and everything. The pandemic was phony, planned, and executed according to plan. Yes, it was a real disease; no, it did not fit the historical definition of a pandemic. Our government sent China the money to make it easily contagious. Many of our leaders have been in bed with China, an evil totalitarian, communist regime, a long time. The January 6 “insurrection” was staged – to intimidate. Many of your leaders are colluding with your enemies, and being bribed behind the scenes, with what they can take, once the new totalitarian government is established. Ten kings, empires, foretold in scripture, are rising by their plans. You are watching a puppet show, with feigned concerns and hand wringing, moving step-by-step according to plan. Russia takes this, China takes that, etc. – all agreed ahead of time.

The press, the media, controls the nation, and deceives the people daily. The vast majority of the media is now controlled by those that seek control of the nation and the world. They elect your politicians. Those not controlled by them to at least be supportive of their step-by-step plans, will likely be given only negative press coverage – or outright slandered, until driven from the public square. Thus the media are being visibly judged. They are the true rulers of the nation. One alliance of evil controls the major media.

Defense, of yourselves and your families, is not their concern. They seek control, total control, so that they can do as they please with anyone they please, including your children. The wisdom of the founders, who had seen a government become coercive, and seek to disarm them in order to become more coercive, was to provide a constitutional amendment protecting their right to keep and bear arms. They knew being armed was their last sure defense against tyranny – because they had resorted to it against a tyrannical king and his government. The provision was not about hunting, and it was not about a militia somehow equivalent to our national guard. And “regulated” did not mean they wanted lots of “regulations,” as we call them today, on that right. Regulated meant trained. And “regulars” were the highly “regulated,” or highly trained, troops. Militia often were everyday citizens with little training – so they mentioned the benefit of training them, them being “well regulated,” for the safety of the nation.

The equivalent of the referenced militia today would be for local sheriffs to use the authority, that at least used to be in the law, for them to raise and train a local militia for the safety of their county or parish. But the second amendment is not just about that. It was recognizing the most natural of natural rights – self-defense, and defense of one’s family and the helpless around them. The police cannot be expected to rush to your house in time to stop a murderer, a rapist or a thief, and court decisions acknowledge that. But if you are going to get a gun for the first time, be sure to be “well regulated” – well trained in how to use it safely. But know that a rifle is a lot

easier to aim accurately, under stress, than a pistol. However, a pistol can potentially be carried all the time for short-range defense where reasonable accuracy is attainable with a little training.

But, the weapon the cabal of evil in control of the nation at this time most seeks to take from us is the very one God has spoken of being most necessary for the defense – and survival – of the nation. They have let a flood of terrorists come through our borders for a long time. They are ready to strike us from the inside, anywhere they choose. Read that as Main Street, Anytown, USA. If terrorists bring their weapon of choice, the AK-47 assault rifle, to your mall or your main street, how do you stop them? If they go to your schools, how do you stop them? The police “Special Weapons and Tactics” teams, “SWAT” teams, choose at least the AR-15 that many, all over America, see the wisdom of owning for protecting their own families, until the police can send a SWAT team – which does not typically happen right away.

Does your community even have a SWAT team? How quickly can it come to your house? What if there are multiple attacks in your city at the same time? Will you get put on a waiting list? Don’t think you can defend against an AK-47 with a pistol. They will stay outside your range, or the range of your accuracy, and fill you with bullets before you even manage to aim the first shot. They can rain bullets upon where you are ducking until their terrorist team member walks up for a clear shot at where you are hunching down wondering what to do.

Terrorists intend to conquer America from within. How will you stop them? The police will be the first to die. Who stops them next? The military can’t go defend every town in America from terrorists attacking all over at the same time. Neither can the national guard. State controlled guards (not subject to federal control being imposed to send them out of the state) are possible under the law, and we can use them, but few states have them, or the capability to protect against simultaneous attacks all over. Local militias can be formed, eventually, but, in the meantime, defending you, and your family, and loved ones, falls upon you. Get ready or die. Get ready or die. That is what is before you. And stop the politicians from taking away your rights and your guns, and make them give them back if they have already taken them – but do this legally, with your votes, and your protests, and making a lot of political noise until they hear. Your lives depend on it.
